

CFS 100 Series

Single Phase AC or DC Power Testing Simplified...

AC Power

DC Power

CFS108	CFS116	CFS140
800 VA	1600 VA	4000 VA
AC Mode: 40 - 500 Hz 5 - 150 V _{LN} / 5 - 300 V _{LN}		
DC Mode: 5 - 200Vdc / 5 - 400Vdc		

Look no further for cost effective single phase AC or DC power test solutions than the compact CFS100 Series programmable power sources. Designed to perform a wide range of AC and/or DC tests with excellent performance and reliability, the APS CFS100 units are industry work horses.

Available in three power levels of 800 VA, 1600 VA and 4000 VA, a wide range of commercial, industrial and aviation type equipment testing is covered. The CFS108 can be operated from either 115V or 230V AC power. Models CFS116 and CFS140 can be operated from single phase 230V or split phase 208V AC power.

CFS100 Series Features:

- Choice of Power Levels to fit your Requirements
- AC and DC Mode Output Capability
- Wide AC Frequency Range of 40 Hz to 500 Hz covers both industrial/commercial and avionics/defense applications
- Extensive List of Measurements
- Fifty Memory Locations with Nine Test Steps for Pass/Fail Measurements against pre-set Limits
- Voltage Drop-out Test Capability built-in
- Programmable Start/Stop Phase Angle
- Voltage Drop-out Test Capability built-in
- Programmable Start/Stop Phase Angle
- Standard USB and RS232 Remote Control Interfaces
- Optional Ethernet / LAN Interface for ATE Test System Use
- Single Phase AC Input on all models
- CE Mark

Worldwide Supplier of Power
Conversion Equipment

EASY POWER TESTING OF AC OR DC PRODUCTS

Testing both AC and DC powered products for performance to specifications and proper operation has never been easier or more cost effective than with the CFS100 Series programmable power sources. These compact rack mountable units make it easy to test single phase AC products or DC powered products, all with the same instrument.

Available in three power levels, the CFS100 units feature an intuitive menu driven user interface with a large backlit LCD display that shows settings and measurements.

Two modes of operation are available to the user:

- **Manual Mode** - Allows manual settings of all output parameters
- **Program Mode** - Allows sequencing through up to 9 test steps, each having distinct output settings and measurement pass/fail test limits

Manual Mode or Pass / Fail Limit Testing

Auto Run MANUAL	F Lo-Lmt	40.0Hz	^
PLC Remote	Start Angle	0°	
Alarm	End Angle	0°	↓
Contrast	Results	LAST	
Power Up	OC Fold	OFF	Edit
V Hi-Lmt	Transient	OFF	
V Lo-Lmt	Lock	OFF	Exit
F Hi-Lmt		<more>	

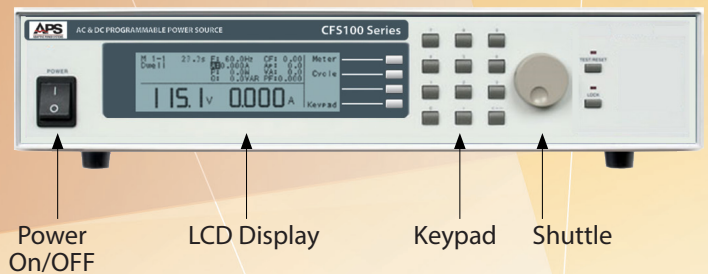

Manual Mode Setup Screen

Manual Mode allows setting individual output parameter settings and limits. By setting limits on voltage and frequency, accidental output settings that could damage an EUT can be avoided. When the Test Output button is pushed, power is applied to the EUT and the LCD screen displays all measurement values. Large characters are used for Voltage and one other parameter selected from the available measurements in the upper half of the display.

M 1-1	60.0s	F: 60.0Hz	CF: 0.00	Result
Set		AE 9.00A	Ap: 0.0	System
		P: 0W	VA: 0	
		Q: 0VAR	PF: 0.000	
				ENET
				<top>

Program Mode Step Metering Display

AC or DC Output Connections

Programs can be stored in the 50 available non-volatile memory locations for quick recall. Each program memory can be assigned a name for easy reference to a test requirement or EUT. For quick setups of lab work, Manual mode is an easy way to change output values and observe measurement data without any limit testing.

Auto Run PROGRAM	OC Fold	OFF	^
PLC Remote	Lock	OFF	
Single Step	Mem Lock	ON	↓
Alarm	Volt Sense	INT	
Contrast			Edit
Power Up			
Loop Cycle			Exit
Results			

Program Mode Setup Screen

Program Mode allows a sequence of up to nine timed test steps to be applied to the EUT. At each step, measurements are taken and compared to pre-set pass/fail limits. If all selected measurements pass, the output proceeds to the next test step once the programmed dwell time has expired. If not, an alarm sounds and the power to the EUT is cut. This mode is ideal for production test and pass fail testing without the need to develop test software.

M Lo-Lmt	0.00A	PF Lo-Lmt	0.000	^
P Hi-Lmt	0W	VA Hi-Lmt	0VA	
P Lo-Lmt	0W	VA Lo-Lmt	0VA	↓
Ap Hi-Lmt	0.0A	Q Hi-Lmt	0VAR	
Ap Lo-Lmt	0.0A	Q Lo-Lmt	0VAR	Edit
CF Hi-Lmt	0.00	Promet		
CF Lo-Lmt	0.00	Ext Trig.	OFF	
PF Hi-Lmt	0.000	Connect	OFF	Exit

Test Limits Setup Screen

All load connections are made at the rear panel. Both AC or DC output are available on the same output terminal strip. An output safety cover is provided.

Instrument Specifications

MODEL		CFS108	CFS116	CFS140
OUTPUT SPECIFICATIONS - AC MODE				
Power Rating		800 VA	1600 VA	4000 VA
AC Output Terminals		Rear Panel (L, N, G), Floating Neutral		
Voltage Ranges	Low / High	5 - 150V / 5 - 300V		
	Resolution	0.1 V		
	Accuracy	$\pm (0.2\% \text{ setting} + 0.3 \text{ V})$		
Current	0-150V	9.2 A	18.4 A	36.8 A
	0-300V	4.6 A	9.2 A	18.4 A
Over Current Capability		4x Rated, 110% for 1000 msec		
Peak Cur.	0-150V	36.8 A	73.6 A	147.2 A
	0-300V	18.4 A	36.8 A	73.6 A
Crest Factor		≥ 3 to 1		
Frequency	Range	40 - 500 Hz		
	Resolution	0.1 Hz		
	Accuracy	$\pm 0.1 \text{ Hz}$		
Start/Stop Phase	Range	0 - 359°		
	Accuracy	$\pm 1\%$, 45- 65 Hz		
Harmonic Distortion (Full Resistive Load)		< 1.0%, 80-140V on Low Range		
		< 1.0%, 160-280V on High Range		
Line Regulation		$\pm 0.1 \text{ V}$ for a 10% Line Change		
Load Regulation		$\pm 1.0\% \text{ Range} + 1 \text{ V}$, R Load		
	Response time	< 400 usec		
Protection		Over Current, Short Circuit, Over Voltage, Under Voltage, Over Temperature

Service and Support

Adaptive Power Systems' customer support is second to none. Our Customer Support Program provides the training, repair, calibration, and technical support services that our customers value. So, in addition to receiving the right test equipment, our customers can also count on excellent support before, during and after the sale. With company owned support and service centers around the world, support is never far away.

New Product Warranty: AC Sources & Loads: 1 year, DC Power Supplies: 2 years.

Complete calibration and repair services are offered at our US, European and Chinese manufacturing facilities (see contact info below). Calibrations are to original factory specifications and are traceable to NIST (National Institute of Standards and Technology).

Power sources and test instrumentation solutions

Caltest have been providing power sources and test instrumentation solutions for over 20 years and are proud to represent a number of industry leading manufacturers.

As well as supplying world class power sources and test instrumentation Caltest also has a service centre and UKAS calibration laboratory.
